Experience

Fluencr

Dec 2023 – Feb 2026

Software Engineer

Remote

- Integrated third-party APIs resulting in notable reductions in engineering costs and a significant boost in product efficiency; conducted thorough testing to ensure seamless compatibility with existing systems.
- Built responsive, user-friendly interfaces using React.JS and Material-UI (MUI), prioritizing usability and aesthetics to enhance overall user experience.
- Engineered scalable RESTful APIs using Nest.JS with emphasis on performance, security, and maintainability for robust front-end to back-end communication.
- Deployed serverless functions using **AWS Lambda** to reduce infrastructure overhead and improve application scalability.
- Containerized applications using **Docker**, ensuring consistent environments across development, staging, and production.
- Implemented a ticketing system via Freshdesk API, streamlining customer support workflows and reducing manual overhead.

Freelance Full Stack Developer

Dec 2023 – Feb 2026

Independent Consultant (Upwork & Direct Clients)

Remote

- Delivered end-to-end web solutions for international clients including **Accudox, Xcore, and Matrix Hub**, managing full project lifecycles from requirement gathering to deployment.
- Built full-stack applications using React.JS, Vue.JS, NestJS, and Node.js across multiple client engagements simultaneously.
- Architected serverless backends using **AWS Lambda** and containerized deployments with **Docker** to meet client scalability and cost requirements.
- Integrated payment gateways, CRM tools, and third-party APIs to automate client workflows and reduce operational costs.

Foomotion HQ

Oct 2020 – Nov 2023

Software Engineer

Lahore, Pakistan

- Designed and implemented responsive user interfaces with **Vue.JS**, Vuetify, and Tailwind CSS, achieving a 15% improvement in user satisfaction scores.
- Containerized development environments using **Docker** to standardize local and production setups across the engineering team.
- Contributed to agile methodologies using Jira and Basecamp, improving team productivity by 15% through iterative development cycles.
- Led development of cross-platform websites via WordPress and PHP customizations, enhancing functionality and user experience.
- Built and maintained RESTful APIs integrated with MySQL and PostgreSQL databases, ensuring data integrity and optimized query performance.

Projects

Fluencr | React.JS, Nest.JS, PostgreSQL, AWS Lambda, Docker

- Designed and deployed scalable RESTful APIs handling high-concurrency requests using Nest.JS.
- Integrated **AWS Lambda** for serverless processing, reducing infrastructure overhead and improving scalability.
- Containerized the application with **Docker** for consistent deployment across all environments.
- Implemented a Freshdesk API-based ticketing system to automate customer support workflows.

ScheduaPay | Vue.JS, Vuetify, Nest.JS, PostgreSQL

- Built a feature-rich, responsive frontend using **Vue.JS** and Vuetify ensuring seamless user experience.
- Developed and deployed a scalable Nest.JS backend with optimized API performance and efficient data handling.

Dualnet | React.JS, Node.JS/Express, MySQL, Docker, Plesk

- Built a real-time data visualization dashboard providing stakeholders with actionable business insights.
- Automated government-format PDF generation, eliminating manual data entry and significantly reducing operational costs.
- Containerized the application stack using **Docker** for reliable deployments on Plesk-managed servers.

Technical Skills

Languages: JavaScript, TypeScript, PHP

Frontend: React.JS, Next.JS, Vue.JS, Vuetify, Tailwind CSS, Bootstrap, Material-UI (MUI), jQuery

Backend: Node.JS, Nest.JS, Express.JS, Laravel, Ruby on Rails, ASP.NET

Cloud & DevOps: AWS (Lambda, S3, EC2), Docker, Vercel, Netlify, Heroku, Plesk

Databases: PostgreSQL, MySQL, Database Normalization, PgAdmin

Tools: Git, GitHub, GitLab, Bitbucket, Jira, Basecamp, Trello, BambooHR, VSCode

Concepts: RESTful APIs, Serverless Architecture, Agile/Scrum, Cloud Computing, CI/CD, AI/ML Fundamentals

Education

Punjab University

Oct 2016 – Aug 2020

Bachelor of Science in Computer Science

Lahore, Pakistan

- **Relevant Coursework:** Data Structures and Algorithms (C++), Object Oriented Programming (C++), Operating Systems, Computer Networks, Artificial Intelligence
